WHAT ARE THE BENEFITS OF A WEB–APPLICATION

Used & trusted by the best
Netflix, Paypal, NASA and the BBC are just some of the big brands using a React Web App over a more traditional website or web app framework

Ability to build a rich user interface
React allows for the building of high-quality, rich user interfaces through its declarative components, the higher the quality of the UI, the better chances that your users will love to use your web app.

Highly customisable components
React is incredibly functional. It's fast, flexible, has a huge community behind it and is the leading Javascript Library for building Web Applications at the moment.

Flexibility
Compared to other frameworks of similar power, the React code is easier to maintain and is flexible due to its modular structure. This flexibility, in turn, saves a huge amount of time and cost to businesses in the medium to long term.

Performance & SEO
React JS was designed to provide high performance in mind. The core of the framework offers a virtual DOM program and server-side rendering, which makes complex apps run extremely fast, great for your users and great for Google ranking.

Code stability
The React data flow and structure provides better code stability and smooth performance of the application.

HOW DOES THE PROCESS WORK?

WE LISTEN

Tell us about your business, what is important to you and what you want to achieve. We will build a costed proposal to aim for these goals, within your budget.

GREAT COMMUNICATION

We use Basecamp, a dedicated project manager,calls and meetings to make sure you are kept fully in the loop, checking we are on the right track every step of the way.

SCOPING

A consultation with us will ensure we understand your business and target market. We discuss the details, key points of complex technical functionality and explore design ideas

DESIGN

The collaborative and creative design process begins with a consultation to understand you and your business

CODING

Planning and building up the core and advanced features and functionality that you need

ROBUST, MULTI-PLATFORM, DEVICE AND BROWSER TESTING

To ensure your site is bug-free and bombproof.

TRAINING

We will create bespoke video guides, tailored to your site, to watch and keep, giving you confidence, access and control.

LAUNCH

Putting your website live on our servers and submitting it to Google

HOSTING & SUPPORT

Our state of the art, UK based servers will keep your site fast and safe. We will be on hand to help you develop your site as your business evolves.
